EXPERIENCE

Akiyam Solutions Private Limited

Gen-AI Engineer Intern (Remote)

May 2026 – Present

Vadodara, Gujarat

- Contributing to the GeoSim Intelligence Platform by developing AI-powered backend solutions and supporting data infrastructure.
- Worked with PostgreSQL and Qdrant to manage structured data and vector embeddings for AI applications.
- Developed Retrieval-Augmented Generation (RAG) pipelines using LangChain and vector databases for semantic search.
- Assisted in integrating Apache Kafka and Debezium CDC for real-time data streaming and processing.
- Collaborated with the development team using Python, FastAPI, Docker, Git, and GitHub.

PROJECTS

MediBot – Chatbot using LangChain

- Developed a conversational healthcare chatbot for medicine and prescription queries.
- Implemented Retrieval-Augmented Generation (RAG) using LangChain and Qdrant for accurate responses.
- **Tech Stack:** Python, LangChain, Qdrant, LLM, RAG

Reddit Bot – AI Agent for Reddit Posting

- Built an AI agent capable of automated Reddit posting and community interaction.
- Integrated Reddit API with LangGraph workflows for modular task execution.
- **Tech Stack:** Python, LangGraph, Reddit API

Product Comparison AI Agent

- Built an AI agent using Groq LLM and Tavily Search API for real-time product comparison.
- Designed a modular workflow for intelligent product analysis and summarization.
- **Tech Stack:** Python, LangChain, ChatGroq, Tavily API

EDUCATION

Government Engineering College, Gandhinagar

Bachelor of Engineering in Information Technology

Jul 2024 – Present

Gandhinagar, Gujarat

Government Polytechnic, Porbandar

Diploma in Information Technology | CGPA: 9.40/10

Aug 2021 – May 2024

Porbandar, Gujarat

SKILLS

Languages: Python, Java, C++, SQL

GenAI: LangChain, LangGraph, RAG, AI Agents, Prompt Engineering

Databases: PostgreSQL, MySQL, Qdrant

Data Engineering: Apache Kafka, Debezium CDC

Backend: FastAPI

Tools: Docker, Git, GitHub, VS Code
